solutions!

What is Parent Portal?

Parent Portal is a **FREE** app that works hand-in-hand with our software solutions. When it's time for parents to collect their children from your setting, they're usually in a hurry to get home and you're busy trying to tidy and prepare for tomorrow. With so much going on, it can be difficult to make sure every family has their invoice and children's details are regularly checked. With Parent Portal, parents and carers can view a newsfeed showing details of their child's day such as meals and observations. It allows parents and carers to see their child's key information and allergies with the opportunity to advise you if things change.

What information can parents view in the Parent Portal app?

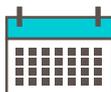

An easy-to-view newsfeed of their child's day – including details of nappies, sleeps, meals, activities and observations supported by photos and videos.

The balance of their account, including a breakdown of their invoices (*both for payments made and any amounts outstanding*)

Important information relating to their child such as allergies, illnesses and medication and request changes

Any past, current or future sessions which have been booked in

Contact details such as the names and telephone numbers of the child's main carer(s)

They can also download and query invoices and payments

Parents can use the Home Observation feature to share their child's activities by uploading videos and photos.

How do parents access Parent Portal?

Parents can download the app on Android or iOS devices – they just need to type 'Parenta' into the Google Play or Apple App store to find it. However, they won't be able to access Parent Portal until they've been given their unique login details which will be issued by your nursery.

Can parents change any of the information they see in the app?

No, the information contained within the app is presented on a read-only basis, meaning it can't be changed by parents. However, parents can request changes by updating details within the 'Family' section of the app which sends you an email with the required changes.

The Parent Portal app is a great way to enable parents to see a timeline of their child's daily learning activities, on the go. Parents can login any time of day, even when your setting is closed.

Work closely with parents!

We've worked with thousands of settings, so we know exactly what tools you need to make your business successful. We believe delivering great childcare means working closely alongside parents; and with Parent Portal, they can stay involved in their child's day.
